

## **Conference on Material Sciences and Technology in Guilin, China**

**Dear Colleagues,**

2018 Spring International Conference on Material Sciences and Technology (MST-S) will be held in Guilin, China during April 23-25, 2018.

We would like to invite contributors like you to participate in this conference. Through this conference, you can present your latest research results and exchange experiences with distinguished speakers in the field of Material Sciences and Technology.

### **[Online Registration System](#)**

#### **Conference Speakers**

- Prof. Laichang Zhang, Edith Cowan University, Australia  
Title: Functional application of iron-based metallic glasses in catalysis technology
- Prof. Alexander Pyatenko, National Institute of Advanced Industrial Science and Technology (AIST), Russia
- Prof. Changjin Zhang, Chinese Academy of Sciences, China  
Title: Discovery of magnetic topological semimetal state in NdSb
- Prof. Xuanjun Zhang, University of Macau, Macau (China)  
Title: Molecular Probes and Nanoprobes for Biological Microenvironment Monitoring
- Prof. Xiang Ma, SINTEF Materials and Chemistry, Norway  
Title: Microscopic Failure Mechanism of Zinc Layer in Galvanized Sheet during Sheet Forming Process
- Prof. Chumin Wang, National Autonomous University, Mexico  
Title: Thermoelectric transport in segmented metallic nanowires
- Prof. C. Bor Fuh, National Chi Nan University, Chinese Taipei  
Title: Development of functional nanomaterials for material characterization and chemical analysis
- Prof. Mohammed M Shabat, Department of Physics, Islamic University of Gaza, Palestine  
Title: Modeling and simulation of Metamaterials- Waveguide Solar Cells
- Dr. Samuel Bernard, Institut Européen des Membranes (IEM), France
- Prof. Hossein Ganjidoust, Tarbiat Modares University, Iran
- Prof. Roshan Paul, Institute of Chemical Technology, Mumbai
